(a) Theoretically pay out a mathematically demonstrable percentage of all amounts wagered, which must not be less than 75 percent for each wager available for play on the device.

(b) Determine game outcome solely by the application of:

- (1) Chance;
- (2) The skill of the player; or
- (3) A combination of the skill of the player and chance.

(c) Display in an accurate and non-misleading manner:

- (1) The rules of play;
- (2) The amount required to wager on the game or series of games in a gaming session;
- (3) The amount to be paid on winning wagers;
- (4) Any rake-off percentage or any fee charged to play the game or series of games in a gaming session;
- (5) Any monetary wagering limits for games representative of live gambling games;
- (6) The total amount wagered by the player;
- (7) The game outcome; and
- (8) Such additional information sufficient for the player to reasonably understand the game outcome.

(d) Satisfy the technical standards adopted pursuant to section 14.050.

2. Gaming devices connected to a common payoff schedule shall:

(a) All be of the same denomination and have equivalent odds of winning the common payoff schedule/common award based as applicable on either or both of the combined influence of the attributes of chance and skill; or

(b) If of different denominations, equalize the expected value of winning the payoff schedule/common award on the various denominations by setting the odds of winning the payoff schedule in proportion to the amount wagered based as applicable on either or both the combined influence of the attributes of chance and skill, or by requiring the same wager to win the payoff schedule/award regardless of the device's denomination. The method of equalizing the expected value of winning the common payoff schedule/common award shall be conspicuously displayed on each device connected to the common payoff schedule/common award. For the purposes of this requirement, equivalent is defined as within a five percent tolerance for expected value and no more than a one percent tolerance on return to player or payback.

3. All possible game outcomes must be available upon the initiation of each play of a game upon which a player commits a wager on a gaming device.

4. For gaming devices that are representative of live gambling games, the mathematical probability of a symbol or other element appearing in a game outcome must be equal to the mathematical probability of that symbol or element occurring in the live gambling game. If the mathematical probability of a symbol or other element is different from the live game, the difference must be disclosed to the player in the area of play or in posted game rules.

5. Gaming devices that offer games of skill or hybrid games must indicate prominently on the gaming device that the outcome of the game is affected by player skill.

6. Gaming devices must not alter any function of the device based on the actual hold percentage.

7. Gaming devices may use an identifier to determine which games are presented to or available for selection by a player.

(Adopted: 7/89. Amended: 9/89; 10/92; 7/10. Effective: 1/1/93. Amended: 12/11; 9/15; 10/16; 12/18; 4/22; 2/26.)

1. In the case of an inter-casino linked system featuring a progressive payoff schedule that increases as the inter-casino linked system is played, have a minimum rate of progression for the primary jackpot meter of not less than .4 of one percent of amounts wagered. In the case of an inter-casino linked system featuring a progressive payoff schedule that increases over time, have a minimum rate of progression for the primary jackpot meter of not less than one hundred dollars per day. The provisions of this subsection do not prevent an operator of an inter-casino linked system from limiting a progressive payoff schedule as allowed by subsection 5 of section 5.112 of these regulations.

2. Have a method to secure data transmissions between the games and devices and the main computer of the operator of an inter-casino linked system, as approved by the Board.

The Chair, in accordance with section 14.015, may allow or require that one or more models of a new gaming device be tested at a licensed gaming establishment(s) for not more than 180 days under terms and conditions that the Chair may approve or require. Upon written request of the manufacturer or distributor, the Chair may, by written agreement, allow the test period to be continued an additional 90 days beyond the 180-day maximum field test period, for the purpose of allowing the application for approval of the new gaming device to be acted upon by the Board and Commission. The Chair shall report all field tests on the agenda of the next regularly scheduled meeting of the Board and Commission.

2. (c) The decision whether to permit a new gaming device to be evaluated utilizing New Innovation Beta is at the sole and absolute discretion of the Chair.

(d) When considering the request to evaluate a new gaming device utilizing New Innovation Beta, the Chair will consider factors including, without limitation, the ability of the gaming device to accurately determine, evaluate, and display the game outcome and the ability of the gaming device to accurately process the acceptance and award of all payments.

(e) The Chair may also consider the approval status of the gaming device in another state or foreign jurisdiction in which gaming is legal and regulated by a government agency with standards for gaming devices materially the same as those in Nevada, the determination of which is within the sole discretion of the Chair.

3. A manufacturer shall not modify a gaming device during the test period without the prior written approval of the Chair.

(b) A manufacturer may object to the termination of the test period by filing a written objection with the Commission. The filing of an objection shall not stay the order terminating the test. If the Commission fails to order resumption of the test within 60 days of the written objection, the objection will be deemed denied. If the Commission sustains the objection, the testing may be resumed under terms that may be approved or required by the Commission.

5. A licensee or manufacturer, or their agent shall not play a new gaming device during a test period. A licensee, or its agent, shall not play a gaming device during a test period.

If the Commission fails to order a test period within 60 days of the written objection, the objection will be deemed denied. If the Commission sustains the objection, the new gaming device may be tested at a licensed gaming establishment under terms and conditions that may be approved or required by the Commission.

(2) A field test will be for a period of not more than 270 days.

(c) The decision whether to permit a modification to an approved gaming device to be evaluated utilizing New Innovation Beta is at the sole and absolute discretion of the Chair.

3. Chair revocation of the approval of associated equipment shall be considered an administrative approval decision, and therefore reviewable pursuant to the procedures set forth under sections 4.185, 4.190, and 4.195 of these regulations.

4. The Chair may publish a list on the Board's website which includes all associated equipment for which the Chair has revoked approval.

1. Upon the revocation of the registration of a manufacturer of associated equipment:

(a) No new associated equipment manufactured by the manufacturer shall be approved; and

(b) Any previously approved associated equipment manufactured by the manufacturer shall be subject to having its approval revoked if the reasons for the revocation of the registration also apply to the associated equipment.

required to file an application to manufacture or distribute associated equipment is not registered, failure to pay such investigative costs and fees is grounds for denial of any application associated with such manufacture or distribution of associated equipment.

4. Failure of any party described in subsection 1 to submit an application for a finding of suitability within 30 days of being required to do so by the Board shall constitute grounds for a finding of unsuitability of that party by the Commission.

5. If the Commission finds any manufacturer or distributor of associated equipment, as described in subsection 1 to be unsuitable under this section:

(a) The registration of such manufacturer or distributor is thereupon revoked as a matter of law;

(b) Any applications for registration as a manufacturer or distributor of associated equipment associated with a party which is found unsuitable are deemed denied as a matter of law;

(d) The same consequences set forth in section 14.303 for a revocation of a registration of a manufacturer or distributor of associated equipment shall be imposed.

6. Failure of a gaming licensee, or any person registered with the Board, to terminate any association or agreement, direct or indirect, with any party found unsuitable upon receiving written notice of the determination of unsuitability constitutes an unsuitable method of operation.

7. Failure of a registered manufacturer or distributor of associated equipment to terminate any association or agreement with any party found unsuitable upon receiving written notice of the determination of unsuitability shall constitute grounds for the revocation of the registration of the manufacturer or distributor of associated equipment.

8. The Commission retains jurisdiction to determine the suitability of any party described in subsection 1 regardless of whether or not that party has severed any relationship with a gaming licensee or registered manufacturer or distributor of associated equipment.

Any such request must be made in writing to the Chair in advance of utilizing the services of the third-party. 5. A registered independent testing laboratory shall not utilize, rely on or otherwise refer to any testing, results or work product performed by another registered testing laboratory for any game, gaming device, associated equipment, cashless wagering system, or interactive gaming system, or any component thereof or modification thereto which has not previously been approved by the Board.

(f) Been placed and remains in the constructive custody of any federal, state or municipal law enforcement authority; or

(g) Had any gaming license, registration or other like credential revoked or committed any act which is a ground for the revocation of a gaming license, registration or other professional credential held by the person or would have been a ground for the revocation of a gaming license, registration or other professional credential had the person held such license, registration, or credential.

➤ All procedures conducted pursuant to this subsection and the results of those procedures shall be documented by the registered independent laboratory. Such documentation shall be made available to the Chair upon request and shall be maintained at all times while a person is employed by the registered independent testing laboratory and for a minimum of five years after a person's employment ends.

7. A registered independent testing laboratory shall implement and maintain a system of peer review to monitor the quality of the inspection and certification procedures performed by its employees.

The obligation to maintain such records continues even if the independent testing laboratory ceases to be registered with the Board, or otherwise ceases its business operation.
